PRODUCT DEVELOPMENT PROCESS

IDEA

Share Your Brief & Signed NDA
The confidentiality of your project is our top priority. Your brief should include details such as your concept, required formulas, packaging, design, claims, target countries for distribution, and budget.

Step 01

Estimation

Get a Price Estimation based on your brief, we will provide a price estimation to ensure it aligns with your business plan and confirms the feasibility of your project.

Step 02

Development

Evaluate Our Samples, Select Your Packaging, and Design Your LabelsThis includes sample submissions, testing, stability and compatibility assessments, ingredients listing, marketing claims, and logo & label design, among other services.

Step 03

Best price

Get Your Final Quote, Place Your Order & Register Your Product
Once your samples are approved, we will provide a final price offer, finalize the commercial terms, and begin the product registration process in your target countries of distribution.

Step 04

Production

Handover to Production, Lead Time & Delivery Arrangements
This includes procurement, project scale-up, lead time management, logistics planning, documentation, and container booking until your order reaches your warehouse.

Step 05

OUR SERVICES

GMP Certification

QUALITY CONTROL

QUALITY CONTROL

Safety is a fundamental pillar of our product quality and overall value.
That is why we strictly adhere to Good Manufacturing Practices (GMP) across every stage of our operations.
As a GMP-certified manufacturer, we are fully equipped to ensure the safe production, packaging, labeling, and storage of our products in compliance with international standards.
Our Quality Control team rigorously monitors each phase of the production cycle, ensuring consistency, precision, and excellence at every step.

Through our commitment to Total Quality Management, we consistently uphold the highest standards of product safety, reliability, and performance.

Our production facility is designed with dedicated, segregated areas for creams, semi-solids, liquids, oils, and powders — an approach that ensures maximum purity, prevents cross-contamination, and guarantees superior product quality and safety.
